

Claremont One-Piece – N4418

The Flapperless Claremont is the only comfort height HET one-piece that features the patented leak-free Flapperless flushing system. Our leak-free Flapperless design paired with a 4.8L flush makes the Claremont One-Piece toilet one of the most water efficient comfort height toilets available. The Flapperless name has become synonymous with performance. Homeowners and industry professionals have come to know the dependability and quality of Flapperless products.

The Claremont One-Piece - Fusion of Elegance and Comfort

The elegant styling of the Claremont One-Piece is highlighted by a concealed trapway for easy cleaning. Complementing the simple and clean aesthetics of the Claremont One-Piece is a designer soft-close seat, included with the toilet.

Flapperless Performance Pays!

The Flapperless Claremont One-Piece along with other Flapperless toilets are eligible for consumer tax rebates in participating municipalities.

Stop Toilet Leaks – Just Think of the Savings

Flexible seals, such as the flapper valve, corrode over time and cause toilet leakage. The Flapperless tip-bucket design ensures that the Flapperless toilet will not leak, since it does not use any flexible seals to control the flushing action. According to multiple sources, toilet leakage is the most prevalent form of household water waste. In most cases, a barely audible toilet leak can waste as much as 200,000L of water per year*.
